DETAILED ACTION

1. Claims 51-60, 62-69, 71, and 72 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the prior art fails to teach disposing a chalcogenide material over a metal layer, diffusing a portion of the metal layer into the chalcogenide material, and then removing the portion of the chalcogenide that does not contain metal ions diffused therein. The prior art of record provides no suggestion of a localized doping of the chalcogenide or that any portion of the chalcogenide would remain undoped. Furthermore, there is no suggestion that it would be in any way advantageous to remove the undoped chalcogenide portions. Since there is very little art dealing with doping a chalcogenide layer with metal diffused from an adjacent structure, and since there is no motivation in the prior art for modifying any of these structures by removing the unreacted chalcogenide, it is the Examiner's opinion that such method steps would not have been obvious to a person having ordinary skill in the art.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
